

Product Warranty extension program **October 2009**

Micronet offers a **One, Two** and **Three** years Warranty extension program. The extended Warranty period/s is an extension of Micronet's original 12 months product warranty coverage, effective on date of invoice, and subject to all its terms and conditions.

The cost of a 1 year extension period is **8%** of unit's price.

The cost of a 2 years extension period is **7%** of unit's price, for each year.

The cost of a 3 years extension period is **6%** of unit's price, for each year.

Other terms and conditions:

- Original 12 months product Warranty period starts on Micronet's invoice date.
- A product Warranty extension must be purchased until 30 days prior to the expiration date of the original Warranty period, regardless of the unit's commercial status (i.e., in inventory, sold, installed).
- Payment for the Warranty extension period/s must be made in full to Micronet, no later than 30 days prior to expiration date of the original product Warranty period.
- A failed product has to be reported via Micronet's website, using the electronic RMA procedure.
- Repair turn around time - within one week from receipt of product at Micronet's premises, or within one week of customer's approval, in case repair charges are not covered by Warranty terms.
- Technical services, following expiration date of the Warranty period, shall be provided by Micronet on a per quote basis.
